DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Wright et al. (USPN 6,416,857).

Wright et al. disclose a tamper indicating device (Column 1, lines 9-10) used in combination with an object having secured information (Column 9, lines 7-18) comprising a backing having a first side and a second side (Column 3, lines 15-16), wherein the backing comprises a first phase and a second phase (Column 3, lines 17-19), wherein the backing has a first level of light diffusion, and when a peeling force is applied to the backing, the backing fractures (Column 3, lines 32-38) and has a second level of light diffusion that is a higher level of light diffusion than the first level of light diffusion (Column 2, lines 27-31); a flood coat applied to the second side of the backing (Column 4, lines 53-56), the flood coat defining a window therein (Figures 1-18, #30A and 30B), an adhesive layer bonded to the flood coat (Column 5, lines 56-58) and a mask applied to the tamper indicating device (Column 4, line 66 to Column 5, line 17), the mask being in partial or whole registration with the window in the

Art Unit: 1772

flood coat (Figure 1, #40) as in claims 1, 3, 6, 7, 10, 14 16, 18, 21, 22 and 25. Regarding claims 2, 5, 9, 13, 14, 17, 20, 23 and 24, the tamper indicating device further comprises at least one security marking applied to the first side of the backing (Column 4, lines 56 - 59), wherein the security marking has the same color as the flood coat (Column 7, line 63 to Column 8, line 7). As in claims 4, 11, 15, 19 and 26, the adhesive layer is a pressure sensitive adhesive layer covered with a release liner (Column 5, lines 56 - 58). Wright et al. also disclose a tamper indicating device used in combination with an object having secured information (Column 9, lines 7 – 18) comprising a backing having a first side and a second side (Column 3, lines 15 – 16), wherein the backing comprises a first phase and a second phase (Column 3, lines 17 - 19), wherein the backing is light transmissive, and when a peeling force is applied to the backing, the backing fractures (Column 3, lines 32 - 38) and become more opaque (Column 2, lines 27 - 31); an adhesive layer applied to the second side of the backing (Column 5, lines 56 - 58), wherein the adhesive is colored and bonded to the application surface of the object (Column 9, lines 37 – 42) and a mask applied to the tamper indicating device (Column 4, line 66 to Column 5, line 17), the mask being in partial or whole registration with the window in the flood coat (Figure 1, #40).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Nordmeyer whose telephone number is (571) 272-1496. The examiner can normally be reached on Mon.-Thurs. from 7:00-4:30 & alternate Fridays.

Application/Control Number: 10/828,453

Art Unit: 1772

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
